

INTERNATIONAL VIROTHERAPY CENTER

January 19, 2016

Grant programme announcement

The International Virotherapy Center (IVC) was founded to co-ordinate and promote oncolytic virotherapy worldwide. The mission of the IVC is to provide cancer virotherapy to every patient who would benefit from it. One of the most important objectives of IVC is to support research in the oncolytic virotherapy field and to establish the knowledge base for the practical use of virotherapy.

1. The International Virotherapy Center announces a grant programme up to a maximum of 3000 EUR for publication of prospective or retrospective clinical research, and case reports on oncolytic virotherapy in a Pubmed indexed journal.
2. The International Virotherapy Center announces a grant programme to a maximum of 1000 EUR for publication of prospective or retrospective clinical research, and case reports on oncolytic virotherapy in a popular science journal.

Competition rules

The grant application is open for all scientists except employees of the IVC and related companies workers.

The grant is awarded after publication of the respective manuscript.

The research described should be about the use of Rigvir, not the use of Rigvir in combination with other drugs, food supplements etc.

Applicants are encouraged to apply for an early opinion on feasibility of the project; a draft manuscript should be provided prior to submission to a journal.

Applications and draft manuscript files not larger than 10 MB should be sent to: peteris@virotherapy.eu
